About me

- B.Tech Computer Engineering Student with a solid foundation in Data Structures, Algorithms, and Core Software Engineering principles.
- Active Hackathon Competitor with participation in 10+ hackathons, consistently securing top 15 positions in multiple competitive events, and holding 20+ certifications in AI/ML, Generative AI, and cloud development.
- Multi-Language Developer proficient in C, C++, Python, and Java, with hands-on experience designing, developing, and testing scalable software systems.
- UI/UX-Focused Engineer skilled in translating user requirements into responsive web applications using React, HTML/CSS, and Figma.
- Cloud & AI Enthusiast experienced in deploying solutions using Google Cloud, Vertex AI, Gemma, and Ollama, with a strong ability to rapidly master and adopt new technologies.

EDUCATION

BTech in Computer Engineering

2024 – Present

SVKM's Shri Bhagubhai Mafatlal Polytechnic and College of Engineering

PROFESSIONAL EXPERIENCE

Infosys Springboard - AI/ML Intern (2months)

- Applied engineering principles to design, develop, and test EnviroScan, an AI-powered dashboard for air quality monitoring and forecasting across major Indian cities.
- Built innovative software solutions utilizing Python & Streamlit, integrating machine learning models for AQI forecasting and real-time data visualization (charts, geo-maps).
- Enhanced product quality and user experience (UI/UX) by implementing features like light/dark themes, performance optimizations, and professional reporting (PDF/CSV export).
- Collaborated effectively in a cooperative team environment on version control, bug fixes, and deployment, contributing to a production-ready tool with 15+ features.
- Proactively learned and adopted new engineering methods (Python, Streamlit, ML algorithms) to deliver comprehensive features.

TECHNICAL SKILLS

- **Languages:** C, C++, Python, Java, TypeScript, JavaScript
- **AI/ML & GenAI:** Gemini, Gemma, Ollama, Vertex AI, AI Agents, Copilot, NVIDIA Nemotron Safety Guard, AI Bias & Fairness Auditing
- **Web & UI:** React, Next.js, HTML/CSS, Figma, Canva, Three.js, Recharts, Responsive Design, UI/UX
- **Cloud & Development:** Google Cloud, Git/GitHub, CI/CD, API Integration, Node.js, Vercel, Render
- **Software Engineering:** DSA, OOP, Testing, Code Review, Scalable Systems
- **Soft Skills:** Leadership, Communication, Teamwork, Problem-Solving, Research, Adaptability, Time Management

PROJECTS

ModelMarket - An easy, gas-free shop for AI tools

- What it does: A digital store that lets users try premium AI tools using blockchain payments, but without the headache of complicated wallets or transaction fees (gas fees).
- Key Features: Completely hides blockchain complexity to make payments smooth and gas-free, lists all transactions in a live tracking ledger, and features built-in tools like a Resume Roaster.

ShadowVault - A tool to keep AI systems fair and unbiased

- What it does: It checks AI databases and chat systems to make sure the AI isn't making unfair decisions based on things like race, gender, or age.
- Key Features: Audits data files to spot unfair treatment, adds a single-click "Check for Bias" button next to AI replies, and stops hackers trying to force the AI to be discriminatory.

PromptVeil – AI-Powered LLM Security & Threat Detection Platform

- What it does: It stands in front of AI models and blocks hackers or bad prompts from tricking, confusing, or stealing information from the AI.
- Key Features: Scans prompts instantly to block harmful commands, scores how risky a prompt is from 0 to 100, and displays all blocked threats on a simple security dashboard.

UPI Sahayak – AI-Powered UPI Fraud Detection & Dispute Assistant

- Built a multimodal AI assistant to detect fake payment proofs, verify transactions, and automate bank dispute filing for small merchants
- Integrated Google Gemini (Vision + Audio) with a React + FastAPI + Firebase stack and deployed on Vercel/Render

EarlyShield – AI-Powered Institutional Risk Intelligence Platform

- Built an AI-driven risk detection platform using Google Gemini for predictive insights and operational risk monitoring.

Return Intelligence Platform - Microsoft Imagine Cup 2026

- Developed an AI platform to identify product return causes from customer feedback using explainable AI.

AutoAI – Agentic AI Predictive Maintenance System - EY Techathon 6.0, 2025

- Built an agentic AI system for predictive vehicle maintenance and service optimization.

SheGuard – AI-Powered Women’s Safety App - Hackathon, 2025

- Built an offline-first AI safety app with threat detection, SOS alerts, and live location sharing.

EnviroScan – AI-Powered Pollution Monitoring System - Internship, 2025

- Developed ML-based pollution monitoring with AQI analytics and geospatial dashboards

AidGrid – AI-Powered Blood Donation Platform

- Built a real-time platform connecting blood donors, hospitals, and emergency requests.

Soulence – AI Mental Health Companion

- Designed an AI-powered mental health companion with mood tracking and chatbot support.

CERTIFICATIONS & ACHIEVEMENTS

- **HEAT ignite Atlas** - Winner (Top 2 out of 50+ teams)
- **Hack with Mumbai 3.0** - Winner (Top 3 out of 90+ teams)
- **GDG Mumbai AI hackathon 2.0** - Finalist (top25 out of 1766 Mumbai+Pune)
- **Infosys Springboard** - 19 Courses Completed (AI, ML, NLP, Deep Learning, etc.)
- **IIT Bombay Spoken Tutorial** - C, C++, CSS,java certification
- **Google Cloud** - Prompt Design in Vertex AI (AI/ML Badge)
- **24hr hackathon Ignite 7.0** - Participation & build SOS blood donation platform

LEADERSHIP & VOLUNTEERING

- Google Big Code 2026 round-1 qualifier
- Led 6+ hackathon teams; strong leadership and project management.
- AI Track Intern, Infosys Springboard (2025); team collaboration experience.
- EY Techathon 6.0 – Round 1 qualifier.
- Event Head, Entrepreneurial Cell Committee.
- Tech Fest volunteer (event ops, video editing, digital promotions).
- Participated in multiple hackathons (online & offline) and Built 7+ projects; skilled in Google tools, Figma, Canva, UI/UX.
